

# Sunset Bible Camp

Dear Sunset Families and Guests,

In response to the rising epidemic of the nuisance known as “Bed Bugs” we wanted to let you know the steps Sunset Bible Camp is taking to safeguard your experience and assure your continued confidence in Sunset. “Bed Bugs” are transferred by luggage in and out of hotels and camps. Here at Sunset all cabins are checked for cleanliness and insects. Cabins are sprayed and treated with a chemical that prevents “Bed Bugs” from laying eggs.

“Bed Bugs” are killed by extreme (140 degrees) heat or extreme cold. Here at Sunset we treat the pest by superheating the cabins to 150-170 degrees for 3 hours at a time. Recently, as a last line of defense and prevention, Sunset has partnered with Superior Termite and Pest Control Incorporated to treat all cabins on a quarterly basis using a license only chemical that is safe to humans.

If any bugs are located during the routine sweeps, or by a guest / staff member we will immediately treat the affected bed with a chemical treatment. The cabin must remain empty for 4 hours after the treatment. If this occurs during a guest’s stay, we will help facilitate the washing of all laundry and bedding and heat drying at the Mannford laundromat.

Thank you for becoming a part of our family and for helping us to continue to be a leader in dealing with this new problem. We look forward to serving you again in the future and thank you for your cooperation and support.

In Christ
